

A Room for Worship in 3D

If you could design a room just for worship, what would it look like? Maybe it's like the sanctuary at your church. Maybe it's like your living room. Maybe it's totally different! Make a model of it using the pattern below. Color the sides of the diorama below. Then cut out the pattern, fold up the sides, and glue or tape them together to see your room in 3D.
